

Gene Turner

Identity Theft Revealed

Keynote Seminars Training

Captivating audiences for more than 20 years, Gene Turner uses his unique style to deliver informative, entertaining presentations and seminars that will delight and educate audiences.

Gene Turner's background gives him a unique perspective on the topics of identity theft and personal safety. Gene has worked in the insurance industry, for the Social Security Administration, in the advertising industry and is an independent representative for legal services. He understands the methods thieves use to steal your personal information.

Gene Turner, Certified Identity Theft Risk Management Specialist

Identity Theft Specialist

Thoroughly researching the latest trends in identity theft and personal safety, Gene Turner is an Identity Theft (IDT) specialist rather than an expert. That's because most "experts" know one area of identity theft very well, while Gene takes a bigger view by examining five areas where identity theft flourishes:

- Department of Motor Vehicles
- Social Security
- Criminal
- Medical
- Financial

Gene's broader approach goes beyond financial identity theft and helps you understand why protecting your identity is important regardless of your credit standing.

20 Ways to Steal Your Personal Information

Gene Turner knows the tricks thieves use to get at your personal information. During his seminars, he exposes the latest deceptions that thieves employ as well as the old favorites that still work. And he shares steps that you can take to help protect your identity.

Demystifying FACTA

The Fair and Accurate Credit Transaction Act of 2003 (FACTA) is designed to help businesses and consumers in the struggle against identity theft. However, not

everyone understands or is even aware of how it works. Gene Turner explains FACTA in plain language, showing how it can help business owners and individuals.

Taking Back Your Identity

Most identity theft victims don't realize that they are victims until it's too late. Gene Turner tells what you need to do when you are a victim. Who do you notify first? How do you stop it? How can you protect yourself in the future? Gene outlines the process of how to restore your identity and protect yourself from future attacks.
